PROFESSIONAL EXPERIENCE

Korcomptenz | ERP Consultant

- Provide functional and technical support for **Microsoft Dynamics 365 Finance & Operations**, focusing on ERP transactions, procurement, inventory, and business application operations.
- Collaborate with business users and technical teams to investigate functional issues, analyze requirements, and coordinate resolutions.
- Support procurement and inventory transaction investigations, including business data validation and issue analysis.
- Analyze **D365 F&O tables, data entities, and relationships** to support SCM reporting requirements.
- Develop and validate **SQL/Fabric views** for D365 F&O Sales and Production MIS reporting.
- Work with **Microsoft Fabric, Power BI, and Dataverse** to support ERP data integration and analytics.
- Administered **Power Platform environments**, including D365 database refreshes, VM deployments, solution and package deployments, and capacity and storage monitoring, along with user access and security role management.
- Support **User Acceptance Testing (UAT)**, defect management, functional validation, and application enhancements.
- Handle deployment automation using **Azure DevOps**, along with database refreshes and environment management.
- Coordinate deployment activities and post-deployment validation with development and business teams.
- Document functional issues, technical findings, and application support resolutions.

Alpha Variance Solutions | Microsoft Dynamics 365 Engineer

- Delivered functional and technical support for **D365 Finance & Operations, Commerce, and Sales Hub** across enterprise client environments.
- Managed **L1/L2/L3 incidents**, analyzed functional issues, and coordinated resolutions with business users and development teams.
- Supported SCM processes including **procurement, purchase orders, vendor data, inventory transactions**, and workflow issue investigations.
- Investigated transaction discrepancies and assisted with functional validation of ERP enhancements and application fixes.
- Collaborated with stakeholders to understand reported business issues, reproduce problems, and validate resolutions.
- Executed **D365 F&O and Commerce deployments** across Tier-1 and Tier-2 environments, ensuring seamless updates and patching.
- Managed **Azure DevOps** repositories, branches, build and release pipelines, and CI/CD activities.
- Supported **Microsoft Fabric and Power BI** reporting, including data analysis and validation.
- Performed environment administration, **database backup and restoration**, application monitoring, and performance troubleshooting.
- Supported Power Platform, Microsoft Azure, **Intune, and Microsoft 365** administration, including user onboarding, licensing, and device compliance.
- Led Jira and Zoho implementation initiatives and participated in 24×7 on-call support during peak workloads.
